Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 15 August 2000.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1-13 are rejected under 35 U.S.C. 102(e) as being anticipated by Mills, US 6,311,204.

[claim 1]

A decoder for a digital audiovisual transmission system (fig. 1), the decoder comprising a processor for decompressing and displaying compressed digital picture data (52) and a memory (56), characterised in that the processor is adapted to decompress and store an image file in its substantially original format and subsequently to convert the image file to at least a second format for storage and display (60), the first

and second format versions of the image file being stored contemporaneously in the memory. For details, see col. 8, line 33+.

[Claim 2]

A decoder...in which the processor is adapted to convert the image file into a plurality of formats stored contemporaneously with the original version in a memory of the decoder as claimed, reads on Mills at col. 2, lines 18-41.

[claim 3]

A decoder...which the processor is adapted to read and display multiple format versions of an image file stored at that time as claimed, reads on Mills at col. 2, lines 18-41.

[claim 4]

A decoder...in which the processor is adapted to define a plurality of regions in a graphic layer corresponding to a region of the display, each region being defined in part by a location co-ordinate and by the format version of the image files that are processed by the graphic processor and displayed in this region as claimed, reads on Mills at col. 13, line 10+.

[claim 5]

A decoder...in which the processor is adapted to convert an original image file destined to be displayed in a region into a version corresponding to the format version currently used in that region as claimed, reads on Mills at col. 14, line 65+.

[claim 6]

A decoder...in which the processor is adapted to process images in the graphic layer superimposed over real-time audiovisual digital data and corresponding to one or more layers displayed on the screen beneath the graphic layer as claimed, reads on Mills at col. 13, line 10+.

[claim 7]

A decoder...which the processor is adapted to decompress picture data sent in a compression standard that uses a look-up table as claimed, reads on Mills at col. 2, line 42+, col. 13, line 10+.

[claim 8]

A decoder...in which the processor is adapted to decompress picture data sent in a standard that uses a red/green/blue colour value associated with each pixel as claimed, reads on Mills at col. 13, line 10+.

[claim 9]

A decoder...in which the processor is further adapted to directly decompress picture data regardless its compression format into a image file of a predetermined format as claimed, reads on Mills at col. 2, line 20+.

[claim 10]

A decoder...in which the processor may be further adapted to directly decompress picture data into a format which uses a look-up table as claimed, reads on Mills at col. col. 2, line 42+, col. 13, line 10+.

[claim 11]

A decoder...in which the processor may be further adapted to directly decompress picture data into a format which uses a red/green/blue colour value associated with each pixel as claimed, reads on Mills at col. 13, line 10+.

[claim 12]

A decoder...in which the processor comprises a general processor for decompressing digital picture data and a graphic processor for preparing the decompressed data for display as claimed, reads on Mills in figure 1 and its respective disclosure.

Claim 13 in its entirety is encompassed by claim 1 above, thus the grounds for rejecting claim 1 also apply here. See also col. 2, line 20+.

Specification

3. This application does not contain an abstract of the disclosure as required by 37 CFR 1.72(b). An abstract on a separate sheet is required.

Drawings

4. Figure 1 is objected to because all diagrammatic blocks are required to be labeled to indicate contents or function. See 37 CFR 1.83 (a), 1.84 (g). Correction is required.

5. Claims 14-15 have been canceled.
